Project Requirements

SQL Data Warehouse Project

REQUESTED BY	PLATFORM	TEAMS
Business stakeholders	SQL Server	Data Engineering · Data Analysis

The project has two parts: first build the data warehouse, then build analytics and reporting on top of it.

Building the Data Warehouse (Data Engineering)

Objective

Develop a modern data warehouse using SQL Server to consolidate sales data, enabling analytical reporting and informed decision-making.

Specifications

- **Data Sources**: Import data from two source systems (ERP and CRM) provided as CSV files.
- **Data Quality**: Cleanse and resolve data quality issues prior to analysis.
- **Integration**: Combine both sources into a single, user-friendly data model designed for analytical queries.
- **Scope**: Focus on the latest dataset only; historization of data is not required.
- **Documentation**: Provide clear documentation of the data model to support both business stakeholders and analytics teams.

BI: Analytics & Reporting (Data Analysis)

Objective

Develop SQL-based analytics to deliver detailed insights into:

- **Customer Behavior**
- **Product Performance**
- **Sales Trends**

These insights empower stakeholders with key business metrics, enabling strategic decision-making.
